DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 32-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding the phrase "mutually cooperating", in the independent claims, it is not clear what Applicant intends for this recitation to encompass, i.e. does it represent a "physical" or "spatial" relationship of the shaving disks or a "functional" relationship of the shaving disks. The language in the written disclosure does not seem to expound on the meaning of this phrase. Clarification is requested. For the purposes of Examination, the Examiner interprets the phrase "mutually cooperating" as meaning "working together".

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wahle (US. Pat. No. 4,037,608).

Art Unit: 1731

Wahle discloses a unit for forming a tobacco rod comprising a forming conveyor 4 for conveying a stream of tobacco 2 ; two cutters 36,37 working in tandem (corresponding to the claimed "mutually cooperating"), run by two distinct motors 38,39, each of which comprises a respective shaft ; a density sensor 24; and a control unit 43 which obviously enables each of said motors to impart a particular speed to each of the cutters (see fig. 2).

Regarding claim 33 and 34, these limitations do not patentably distinguish the claims from the Wahle reference because they impart functional, rather than structural, limitations to the claim. Claims directed to apparatus must be distinguished from the prior art in terms of *structure* rather than *function*. (Emphasis added) *In re Danly*, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does." *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 15 USPQ2d 1525,1528 (fed. Cir. 1990). See MPEP 2114.

Allowable Subject Matter

5. Claims 35-38 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
